Work experience

Senior Software Engineer   11/2018 – 05/2019
Cherwell Software, Bend, Oregon

- Senior software engineer working on strategic enhancements for Cherwell Service Manager, a market leading ITSM product.
- Successfully completed enhancements from the product backlog during 2 week sprint cycles.
- Actively participated in development ceremonies including scrum, sprint planning, code reviews, task sizing, team retrospectives and conducted several demonstrations during all-hands, all-team product reviews.
- Primary technologies used in this role were C#, SQL Server, Visual Studio 2017, Git, Bitbucket, Jira and Team City.

Senior Software Engineer   08/2011 – 11/2018
American Fidelity, Bend, Oregon

- Senior software engineer on the FFGA team fully responsible for design, maintenance and operations of the core line of business system responsible for processing $100+ million of monthly policy premium for over 700k participants.
- Used C#, SQL Server and Visual Studio as primary tools for development of this system.
- Integration system included sophisticated SSIS processes, C# processes for workflow and an AngularJS/WebAPI admin console for system management.
- Worked with Jenkins and Octopus Deploy for full CI/CD integration processes.
- Advocated for and lead implementation of scrum adoption.
- Served as a scrum master on a rotating basis.

Software Engineering   11/1995 – 08/2011
See LinkedIn for Full History

- Main technologies used during this time were C#, SQL Server, ASP.NET, WebAPI, Web Services, WebForms (HTML, CSS, JavaScript, jQuery) and WinForms.
- Highlights include high visibility projects for companies such as Mary Key, Avanade and Devon Energy.

Education

Computer Information Systems   1992 – 1995
Oklahoma State University - Oklahoma City

References

John Fitzgerald
American Fidelity, (from LinkedIn)

Brandon is a competent and professional developer I've had the privilege to work with. He enthusiastically takes on the most challenging tasks and projects, provides detail analysis of the problem, and manages expectations of the business until completion of the solution. His eyes and ears are open to new technology trends and he provides a lead role in helping the team adopt the latest technology into the systems the team manages.

Melvin Randle
Broadlane, (from LinkedIn)

While at Broadlane, I was fortunate to work with Brandon. He became my go to person for my respective areas of responsibility. It was apparent from our first day together that he truly focused on the customer's needs and exceeded them each time. I was constantly amazed with the speed in which he could turnaround a customer requests, this is truly a mastered art. I appreciate Brandon and what he brought to my team. I would recommend Brandon to any company that is looking for candidates that place the customer first and are in need of someone that consistently exceeds customer expectations. It is my hope that our paths cross again.
